

I have known Palle since 2021 when we met at go-karting in Vandel.

Since we are of similar age, at that time Palle was a bit faster than me, but still within reach.

In the meantime, Palle has had the will to put in the necessary training hours, and thus gladly drives 6 hours by car to go go-karting for 1 hour!

The extensive training effort has paid off, so today Palle is consistently faster than me and is approaching the young talents.

I have been go-karting with varying intensity for the last 30 years, but in the last few years I have taken it more seriously and participated in training sessions and actual race events.

My two sons, who are about 30 years younger, are participating in the GK98Westcoast series this year, and although they are overall ahead, I beat them both in a race last weekend, despite my age!
